N.B. Session 1 - Clarification of factual matters will not include an opportunity for speeches. It is strictly a question session to allow people to clarify any technical matters which may come to mind.

N.B. In order to facilitate the discussion on what is a relatively long document, I would ask anyone who has any suggestions for changes to put them in writing to arrive in Headquarters by Friday morning. This will allow some time to consider possible amendments which could enhance the document. A form of wording for substitute proposals is important to ensure effective discussion on the issues.
