SEATTLE WASHINGTON TUESDAY, AUGUST 13, 1913. STATE ELECTIONS. This Article Now Ready for the Constitution.

THE SITUATION IS SERIOUS. In the face of our recent terrible experience, and with the example of Ellensburg and Spokane Falls fresh in mind, our people, strangely enough, seem utterly indifferent to the fact that we are practically without fire protection. The situation is very serious. Insurance is in many instances, absolutely denied, while the rates everywhere in the business are ruinously high. Failure to provide proper safeguards is costing, in excessive rates of insurance, many thousands of dollars each month—five times the cost of providing such safeguards. How seriously this affects general business, aside from the severe direct tax which it puts upon us, business men need not be told.
