

3/12 2:55 pm Henry (LONDON)

① T. and meeting re-lent. They're not doc. identify obstacles/commitments. Started in June behind w/d deliver peace. Amark drops. Ten days ago yes. Today not clear. Always a judgment. I've doc never glory till 4 hrs ago. Only needed political clearance. Not trying to blackmail HM but every damn word: both trying to destruction. Conscious genuine part of moments. No new ones. 'John not done'; also of handwritten + actual obstacles of formalities. If proceed in this direction. Needs plan few days. Pick a strong word for place. Need a period over a couple of weeks. We think balance/acknowledging - why he but being helpful. Fixed bracket to provide for 1. way

Fair, balanced. Language we had better learn to change. For levels accommodate over of side. If or, joining. Objective is creation of evidence. Real fears of moments or uncertainty of future + concern of NI. Does freeze present status quo, & improves project for tech. Research NI. committees. Generational bit away parameters (on present next generation being very (as with handsets), John's many legalities. They will stop if states do. Right we can find formula. What, when done a simple thing. (but we be only (as per) to have done away with drama of peace. Can evaluate of Brussels. Bill was split in PIRA. (but let's not to talk about: more I keep very one

② PM. Not's optimistic. Both had more frustrations between us. Just to say, we looked at them carefully. Both sides own reasons for grievances. But behind. Only paramils can benefit.

- i) never likely a clear sign-path of dramas/work way, but more. learn, lists, distractions. Keep on.
- ii) what are we doing. How to disagree on textual parts but consider over a few months ago. In a project v. difficult & concerning.
- iii) You want balance. It's months & depends on words has changed. mixture of work.
- iv) genuine fears of people, doing it's your best bids to meet them from behind. Or head on

Try to deal meaning for unambiguities. I have
proposed some small bits, some are. but though, much can be
handled. You have changes.
T. bits go ahead on language one way or other. U's input (comes)
